## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-10	YES
	Claims		NO
Inventive step (IS)	Claims	1-10	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-10	YES
	Claims		NO

### 2. Citations and explanations

The following documents cited in the search report are mentioned in present report:

D1: EP 1 096 141 A

D2: JP 2002 339793 A

D3: JP 07 139736 A

1. Document D1 (figures 1-3) can be considered to be the closest prior art. D1 describes an internal combustion engine spark plug as per the preamble of claim 1. The pressure in the combustion chamber is measured by means of a piezoelectric element that detects the movement of an internal portion (204) of the plug relative to an external portion (201) thereof. There is no measurement or detection of any movement relative to the engine cylinder head (1). It follows that the subject matter of claim 1 is novel (PCT Article 33(2)).

The spark plugs shown in documents D2 and D3 also measure the pressure in the combustion chamber in a self-contained manner, i.e. without quantifying the movement of one portion of the spark plug relative to the engine cylinder head. It follows that a

person skilled in the art would not be able to arrive at the subject matter of claim 1 by combining these documents. Therefore, the subject matter of claim 1 involves an inventive step as defined in PCT Article 33(3). Industrial applicability is obvious.

2. Neither document D1 nor the prior art therein has been cited in the description (PCT Rule 5.1(a)(ii)).
